Proposed Floating LNG Plant

ORIGINAL

I am writing this letter in protest of the proposed floating LNG plant in the Long Island Sound. It is dangerous and unnecessary.

- This project would industrialize the Sound by giving away several square miles of a public resource to foreign companies.
- The Broadwater project would require a security zone, which would prohibit public access to the open waters of the Sound. This would set a dangerous precedent for all estuaries in our nation.
- The Sound generates over \$5.5 billion annually for the local economy while providing essential habitat and breeding grounds for many of New York's and Connecticut's protected species.
- \$500 million have been invested over the last decade to restore the quality and beauty of the Sound in order to pass it on to future generations, not to foreign oil companies.

Please, if you care about the environment and the people who live on Long Island and in Connecticut, you will not let this proposed plant be built.

Sincerely yours,

Nancy Cimilluca
